-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## Status

- 1) ☒ Responsive to communication(s) filed on 05 August 2003 and 22 December 2003.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Art Unit: 3765

Claims 22-39 are allowed.

The following is an examiner's statement of reasons for allowance:

Claim 22 and its dependent claims are allowed because claim 22 specifically requires a yarn feed tube bank having at least two separate tube bank sections receiving yarns from yarn feed devices of a yarn feed unit and a control system for controlling operation of the yarn feed devices based on programmed pattern information.

Claim 31 and its dependent claims are allowed because claim 31 specifically requires a yarn feed distribution device having a series of yarn feed tubes arranged in separate tube bank sections each receiving one of the yarns from yarn feed devices and a yarn feed controller controlling operation of yarn feed devices in response to programmed pattern instructions.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-3,6,7,9-17,40-42, and 45-47 are rejected under 35 U.S.C. 102(b) as being anticipated by Morgante et al (U.S.P. 6,244,203), cited by applicant on the PTO-

Art Unit: 3765

1449 filed October 30, 2003. The patent to Morgante et al (203) discloses a tufting machine for forming tufts of yarns in a backing material passing therethrough comprising at least one needle bar 27, Fig. 1 having a series of spaced needles positioned therealong (see col. 4, lines 2-3), a yarn feed unit 30 comprising a plurality of yarn feed devices each including a drive motor 38 and a drive roll 37 for feeding a supply of yarns to said needles along said needle bar (see col. 4, lines 18-22), a plurality of yarn feed controllers 65, Fig. 6 electrically connected to said drive motors of said yarn feed devices for controlling the feeding of the yarns to said needles, a yarn distribution device including at least one tube bank 21 through which the yarns are passed to said needles, and a control system 61 in communication with said yarn feed controllers of said yarn feed unit for providing control signals based on programmed pattern information to said yarn feed controllers.

Claims 4,5,8,18-20, and 43 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claim 44 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims and to amend the claim as follows: In claim 44, line , "said tube bank sections" should be changed to --said at least one tube bank section consists of a plurality of tube bank sections that--. The preceding change is deemed necessary to render claim 44 allowable since the claim could presently be read to include only a single tube bank section. In that instance the allowable feature recited

Art Unit: 3765

in claim 44 (viz. a plurality of tube bank sections that are scrambled) would not apply.

This interpretation of the claim is based upon the recitation of "at least one tube bank section" in claim 40, line 6 – note that claim 44 depends on claim 40.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Peter P Nerbun whose telephone number is 703-308-0955. The examiner can normally be reached on M-F (1st Week) M-Th (2d Week).
